Note: At this stage, debt commitments arising from Icesave accounts are not included in Treasury debt. It has been estimated that, after assets of the bankrupt bank have been sold, 73 bn. krónur will have to be paid by the Treasury. Loans from IMF and Norway are to the Central Bank and are therefore not included here.

1. Including accumulated and unpaid interest of the Treasury.

2. The Treasury intends to finance a 385 bn. kr. equity contribution to the new banks with 65 bn. in market securities taken over by the Treasury and through the purchase of market securities from the Central Bank amounting to 320 bn. kr. This amount is being paid for by a takeover by the Central Bank of a loan from the Treasury to strengthen the foreign exchange reserves and with issuance of new Treasury paper.

3. Includes tax receivables, other short-term claims net of short-term liabilities.

4. Deposits of the Treasury and A-budget entities with the Central Bank and other deposit institutions plus deposits in foreign deposit institutions and Treasury foreign exchange deposits.

5. Shares and other equity comprise assets in companies, agencies, partnerships and corporations, and capital contributions to international institutions.

6. Defined as either narrow or broad financial assets net of total debt (narrow: total claims, cash at hand; broad: narrow + shares and other equity).

7. Calculated at average values of each year with the consumer price index and the average exchange rate except the item shares and other equity.
